- SNS
- SQS
- CloudTrail
- CloudWatch
- Route 53
- RDS

Pramod is a dedicated and skilled professional with over 1 year of experience as an **AWS Cloud Engineer**, complemented by 3 years of expertise in **Linux Administration**. He excels in designing, deploying, and managing AWS infrastructure, utilizing various AWS services such as EC2, S3, RDS, and VPC to ensure the successful deployment of applications with 99.9% uptime availability. Proficiency in Linux administration encompasses tasks such as installation, configuration, troubleshooting, and maintenance across distributions including Amazon Linux, Ubuntu, and CentOS. Additionally, he possesses knowledge of programming languages like Python and demonstrates complex technical issues related to both AWS infrastructure and Linux systems to enhance overall system performance. With proficiency in Microsoft Office tools facilitating effective communication with clients and stakeholders, he is eager to bring his experience and adaptability to a challenging role, aiming to make a significant contribution to the organization.

Work History

2023 – Now

Cloud Engineer (AWS)

XOR Bit Infotech Pvt. Ltd., Bhosari, Pune

- Collaborated with development teams to design, implement, and maintain CI/CD pipelines.
- Contributed to product improvement initiatives by providing valuable insights based on hands-on experience with various cloud engineering tools and frameworks.
- Provided technical support to internal stakeholders, diagnosing and resolving complex issues related to the organization's cloud environment.
- Developed custom scripts for automating routine tasks, increasing team productivity and reducing manual errors.
- Implemented security best practices across all cloud infrastructure elements, safeguarding sensitive data from unauthorized access.

2022 - 2023

Sales Engineer

Rudra Automation, Pimple Saudagar, Pune

- Increased sales revenue by consistently meeting and exceeding sales targets through effective

- File System Mgmt.
- Process Mgmt.
- Package Mgmt.
- Volume Mgmt.
- Network & Security
- Shell Scripting

Languages

- Marathi
- Hindi
- English

trends and opportunities for growth.

- Improved overall customer satisfaction by proactively addressing concerns and resolving issues in a timely manner, demonstrating a commitment to exceptional service.

2021 - 2022

Linux Support Engineer

Ajinkya Software Systems, Nagpur

- Managed and maintained Linux-based servers, including installation, configuration, and troubleshooting across various distributions such as Amazon Linux, Ubuntu, and CentOS.
- Implemented security best practices, including regular updates, patch management, and access control mechanisms to mitigate security risks and ensure compliance with industry standards.
- Developed and automated system administration tasks using shell scripting (Bash), enhancing operational efficiency and reducing manual intervention in routine maintenance and deployment processes.
